PILE DRIVING CONTRACTORS ASSOCIATION

PILEDRIVER MAGAZINE REQUEST TO SUBMIT AN ARTICLE

As a member in Good Standing of the Pile Driving Contractors Association (PDCA), I submit this request to have my article published in the association’s magazine, *PileDriver*. I understand this request obligates me to do my best to meet all deadlines for editorial submittal as indentified by the PDCA.

Article Specifications: Articles are generally 800 - 1200 words, but this is merely a guideline. Articles should be of an appropriate length to adequately express the author’s story. Articles must be in MSWord format, not a .pdf. Do not embedded pictures into the article, but forward pictures separately. Pictures should be of the highest resolution possible, but not less than 600 dpi. The author can identify specific pictures and where that picture should reside within the article. The PDCA design team will accommodate those requests as accurately as possible. Articles and pictures can be sent to the PDCA via email to steve@piledrivers.org. Files too large to send can be sent by an FTP site provided by the PDCA. Call for more information.

I am proposing an article for the following *PileDriver* magazine section:

Member Profile: An article about your company, including, but not limited to such information as service/products provided, geographical distribution, staff/employees/leadership, length in business, business history, civic/industry awards, operations, etc. A Company Profile would be similar to any marketing piece you would send to a potential client if you wanted them to know all about your company. You can always review other Company Profiles online at the PDCA website, www.piledrivers.org > Publications.

My Company Membership: Contractor Associate Engineering Affiliate

Project Spotlight: An article highlighting a project in which you company participated including national and international projects. Your company involvement could be as a Prime, sub-prime, subcontractor, supplier, engineer, or consultant. The article should highlight your work on the project, providing a complete overview of the project and your involvement. The article should include other topics such as the type of piles, hammers, challenges, innovative construction techniques, value engineering, testing, safety, environmental concerns or projects which converted other deep foundation methods to driven pile and the reasons. You can also mention other PDCA members who worked with you on the project.

You can also submit articles on on technology, legal issues, business related issues or other relevant driven pile topics.
